Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 1-2 are objected to because of the following informalities:
 - a) In claim 1, lines 5 and 8, the claimed limitation “a registered player account” should be corrected to “the registered player account”.
 - b) In claim 1, line 7, the claimed limitation “a registered player set aside” should be corrected to “the registered player set aside”.
 - c) In claim 2, line 1, the claimed limitation “a player” should be corrected to “the player”.Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson (US Patent No. 6,629,890).

As per claim 1-2, Johnson discloses a method for establishing a registered player set aside and registered player account. The method comprises receiving identification from a player; obtaining the player's authorization to establish the registered player account; registering

the player (col. 2, lines 66-67; col. 3, lines 1-13 and 36-40; col. 4, lines 54-67); establishing a registered player set aside (col. 4, lines 8-16); and establishing the registered player account (col. 3, lines 62-65; and col. 4, lines 62-64). Johnson does not explicitly disclose determining the identification validity. However, Johnson discloses authorizing user when the identification is successfully entered (col. 4, lines 32-37 and 54-62). Further, determining the validity of an identification to determine successful entry would have been well known to a person of ordinary skill in the art at the time the invention was made. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to validate the password identification of the player in order to ensure servicing the correct player.

4. Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ramachandran et al (US 2001/0044747).

As per claim 3-5, Ramachandran discloses a system for establishing an account. The system comprises at least an identification device, an account computer, wherein the identification device and the account computer communicate with each other on the identification information of a user (paragraphs 0043, 0048, and 0061). Ramachandran does not explicitly disclose that the identification information is unique. However, establishing unique identification information for each user would have been well known as mentioned by Ramachandran in another embodiment (paragraph 0072). It would have been obvious to a person of ordinary skill in the art at the time the invention was made to establish unique identification information for each user in order to prevent confusion in recognizing different users. Further,

Ramachandran discloses providing digital signature as the unique identification information (paragraph 0072).
